Pdf file unlocker tool

PDF is the de facto standard for sharing electronic or distribution documents. There are many PDF utilities to choose from when you want to create, edit, and view PDF documents, but here's a look at five of the best tools for working with PDFs. Earlier this week we asked you to nominate your favorite PDF utility (or utility) and now, we're back with the results. Four of the most popular shacks are good old standards, it was on our previous list of the five best PDF readers. Those maps, plus Maniacs PDF, are highlighted below. Adobe creates the Portable Document Format, but that doesn't mean the company acrobat in suites... Read moreFoxit (Windows/ Linux, Reader: Free, Pro: \$129) Foxit Reader is a free PDF reader with a small hand slew of features, including PDF marks and comments, advanced multimedia elements, five levels of security, and even the ability to run JavaScript on the document. There are other versions of Foxit that serve different purposes: PDF Creator (\$29.99) converts other PDF file formats, PDF Editor (\$99) allows you to edit any part of the PDF file, and the Foxit Phantom PDF suite (\$129) includes all the above capabilities plus those more like compared PDF files. Preview (Mac, Reader: Free) Preview is viser of PDF built-in on Mac. In addition to quickly opening PDF files, Preview on Mac OS 10.5 (Leopard) allows you to prevent PDFs (highlight sections, add notes or hyperlinks), rearrange PDF pages, merge PDFs, and add keywords to your files for easy searching from Find. Preview is also a very decent image visage with some editing capabilities. PDF-XChange (Windows, Reader: Free, Pro: \$34.50) Voted the best PDF reader in a previous Sync Hive, PDF-XChange is a lightweight, fast PDF reader with a list of long features, including page markup, export the document or page to image, text extraction, support for 256 bit AES encryption, customizable clients, and more. The Pro version includes more page manipulation capabilities, PDF conversion and creation tools. Last week we asked you to share your favorite PDF reader and then we rounded up the results and put it more Acrobat (Windows/Mac, Reader: Free, Pro: \$299) Acrobat is free PDF viewing tools PDF that's most often integrated into people's browsers. It offers comment tools, integration with the online Acrobat.com service, and a mode to protect your computer from bad PDFs. Although it's not as speed as the other PDF speeds, Reader has access to wider of all kinds of content embedded in PDF files. To create, editing, and more advanced features, you'll need to upgrade either the Standard (\$299) or Pro (\$449) version or get the Suite (\$1,079) – something probably most suitable for their business, given the pricing. Maniacs PDF (Windows, Reader: Free, Pro: \$99) Maniacs Reader is a free PDF viewer that is currently in beta but offers advanced features such as PDF creation, converted to text, type text anywhere on one page, shape and previewing of PDF files in Outlook or Windows Explorer. Upgrade to the Nitro PDF Express version (\$49.99) for PDF Creation and page manipulation capabilities – including unique fonctifabl-processing functionalities – or Maniacs PDF Professional, the original alternative Acrobat for just about everything else you need to do with PDFs.Now it's time to choose the best overall PDF tool. Got a favorite feature that makes your PDF tools of choice stand out? Make us aware of the comments. In Microsoft Word, go to File > Save as > PDF. Or Folder > Print > Save as PDF or Microsoft Print to PDF > Print or Save.On Google Docs, go to File > Download > PDF Document (.pdf). Or Folder > Print > Save as PDF > Save > Save.On Mac Page, go to File > Print > Save as PDF. This article description how to create a PDF using Microsoft Word, the print function of Windows, Google Docs, and Mac Pages. You can also use a free PDF creator; there are many available for download or online. If you have any version of Microsoft Word from 2007 or later, the easiest way to create a PDF is to use the built-in software features. In just a few clicks, you can convert any Word document to a PDF file. Open the Word document you want to convert to PDF and then select File. In the File menu, select Save As. In the Save As dialog, select the Type dropdown menu and then select PDF. Change the title of the document or change the location where you want the file saved and then click Save and your PDF file will be saved to the specified location. If you are using Windows, you have an option to create a PDF file by using the Print function of your computer and is working in any program that you are using disk printing. It is called Microsoft Print to PDF. The options you'll see will depend on the program you're printing out should generally follow this structure: To use Microsoft Print to PDF, in the document, image, or another file you want to use as the basis for a PDF, select Print. In the Print dialog box, change the printer (it can be called Destination or Destination Printer or simply Printer) to Save as PDF or Microsoft Print to PDF. The Google Chrome browser also has a WORKING PDF conversion feature for any web file based on any device using the browser's Chrome. All you need to do is access the Print option and select Print to PDF. The preview will be adjusted to show you what the PDF will look like. If you are satisfied, select Print or Save. When creating documents, spreadsheets, or presentations using Google Drive you have the option to convert these pdf documents, too. You can use the Print menu as above, but in both a Windows or computer, you can also select File > Download > PDF Document (.pdf). The PDF file will be set to your Downloads file. If you are using a Mac computer, you have nearly as many options for creating PDF files as Windows does. Aside from the methods mentioned above, you can also create a PDF file from the pages much like you would from Word in Windows. If the Mac app you are using allows for printing, there's almost a likely 100 steps the same steps below will make a PDF of that app, too. Open the document you want to use to create a PDF on page. Select the File menu at the top of the page and then select Print. In the menu that appears, use the startup menu at the lower-left corner to select Save as PDF. The Save As dialog box opens. Give your document a name, select a location to save it, and add any additional details and click Save. By Cooper Temple Convert or print PDF files allows to be viewed among those who might not have the original software with which the original file was created. As documents are shared among associates with friends, you may have a need to add information to the PDF file without editing the current document. This article will explain different ways of adding information to a PDF file. Launch the PDF file which you want to add text. Click once on the File Options menu. Click once on the Properties option. Click the Description tab in the Properties box to add document details. Based on the original program from which the PDF file was created, some of the information will be pre-full. Note in the example picture that the original document was created on Microsoft Word. On the Description tab, you can change the title, author and subject of the PDF file, as well as add new information to the keyword field. Click the OK button to save your ads and changes. Launch the PDF file which you want to add text. Click once on the Document menu option. Click once on Header & Footer options. Use the Add Header and Footer boxes to add information at the top and bottom of your PDF file. The header and footer sections are divided into three parts each: left, center and right. This feature is fairly robust as far as the amount of control you have on the text and information you add. You can adjust the header and footer margins, as well as the font, size and color of the text. You can add the date and page number, too. Near the bottom of the box, you'll notice that you can preview what the text will look like on the document in the header and footer. Adjust the page number and date appearance, if applicable. Click once on the Page Number and Date Formatting link. From this pane, you can change the page number and date format. See the example. Note that the date is listed as 2/4, but it might be changed to list as 2/4/09 or February 4, 2009. The page number is listed as 1, but it can be adjusted from 1 to 4. Click the OK button to save your ads and changes. Look at the example for an idea about how the footer will look on your PDF file. Launch the PDF file which you want to add text. Click Once on the Comments Options menu. Click once on the Comment & Markup tool options. Click once on Attach a File as a comment option. Click once in the area of the PDF you want to attach the file. Select the file from the Add Attachments box. You can browse through and select any saved file. Please keep your audience in mind. For example, if you plan to attach a Microsoft Word or Excel document, make sure that the others who will see the file have the appropriate software to do so. Consider converting the planned attachments to PDF files before adding them. From the File Attachment Properties box, select the appearance of the icon that will represent the attachment. You can change the color of the icon from that box, as well. After you have uploaded the attachment, you can move it to another location by clicking once and holding the mouse button on the icon to drag it around the PDF file. Click once on the file attachment icon to see it. You can delete the file attachment by right click once on the icon and then press the Delete key. Be sure to save the changes to your PDF after adding attachments to files. Launch the PDF file which you want to add text. Click Once on the Comments Options menu. Click once on the Comment & Markup tool options. Click once on Sticky Note options. Click once in the area of the PDF where you want to attach the Sticky Note. This will mark the place on the PDF with a yellow call and a firing line that leads to a text box with a yellow border. Insert text in the text box with the yellow border. You can adjust the size of the box by clicking on one of the corners, holding the mouse button down and dragging. Once you click anywhere outside the text box, it will disappear. Jon's only call is going to be visible. To view the text in the Sticky Notes, click once on the icon. Similar to the File attachment icon, you can move the Sticky Note icon to another location on the PDF file. Click once and hold the mouse button on the icon to drag it around the PDF file. Be sure to save the changes to your PDF after adding attachments to files. attachments.
